PDF Solutions (San Jose, CA; www.pdf.com < <http://www.pdf.com> >) has announced that Taiwan Semiconductor Manufacturing Company (Hsinchu, Taiwan; www.tsmc.com < <http://www.tsmc.com> >) will integrate PDF's 90-nm Yield Learning Infrastructure into its products. The joint project should be completed in Q4 of this year and will be deployed in TSMC's 300-mm Fab 12.

"TSMC is one of the market leaders and we are excited that it has selected our infrastructure for its 90-nm ramp. By characterizing TSMC's 90-nm process modules across a variety of design attributes, we are confident that products will yield higher and TSMC's customers will benefit. This will help accelerate the adoption of TSMC's 90-nm technology," said John Kibarian, chief executive officer of PDF Solutions, in a prepared statement.
